Rogers Dentist Offers Cutting Edge Technology to NWA

Orthodontics-HandsOn CE

Available Online! 100 CE Hours. Comprehensive Orthodontic Courses

Marcus Black, D.D.S., Offers Patients Innovative Dental Technology

Rogers, AR - February 22, 2016 - (Newswire.com)

Dr. Marcus Black, Marcus Black, D.D.S., of Rogers, Arkansas, offers Northwest Arkansas residents the leading-edge technology of Multiwave Locked System (MLS) Laser Therapy. He is the only dentist offering the service in the region.

With high levels of efficacy, safety and consistency, MLS produces an efficient and simultaneous effect on pain, inflammation, and edema while exceeding the limits of traditional low power laser therapy and concerns of high power laser therapy, according to the product's website. MLS provides more accurate therapeutic dose delivery which stabilizes the results.

MLS Laser Therapy has the capability to control laser energy. The control system that generates the MLS pulse synchronizes the emissions to achieve optimum results. MLS has the capability to control laser energy. Due to this synchronization, the various therapeutic effects not only take place at the same time, but reciprocally reinforce each other, without the risk of thermal damage.

Dr. Black has been practicing dentistry in Northwest Arkansas since 1993 after serving six years in the United States Naval Dental Corp. While serving, he received extensive training in each specialty area of dentistry and was certified in advanced trauma. Throughout his career, Dr. Black has trained with some of the leading cosmetic dentists in the world, completing thousands of hours of continuing education in cosmetic dentistry.

The team at Marcus Black, D.D.S believes that a smile is indicative of health and happiness and is dedicated to their patients and to helping people realize their confident smiles. The dentistry offers a wide variety of services including pediatric, cosmetic, root canals, fillings, dental implants, laser whitening, veneers, crowns, bridges, reconstructive surgery, dentures, oral surgery, orthodontics, periodontal treatment and more.

###
