A Step Above Foot Care Opens New Medical Spa, Adds MLS Laser Therapy Treatment for Pain to Suite of Services

by LONG BEACH POST PARTNER on APRIL 23 2015 14:33 in HEALTH Log In Tweet 0 Share 7 Comment 0

A Step Above Foot Care, one of the most well-known podiatry offices in the Long Beach area, has recently announced not only the opening of their all-new medical spa, but also the addition of a treatment called Multiwave Locked System (MLS) laser therapy to their suite of services, for those in need of relief from foot and ankle inflammation and pain.

ZERO PROSTATE CANCER RUN/WALK Fourth Annual 5K Run/Walk Kids Superhero Dash for Dad Saturday, June 27, 2015 • 8:30 a.m. SHORELINE AQUATIC PARK 100 Aquarium Way • Long Beach, CA 90802

The practice is run by Dr. Marjorie Miller-Khawam, an award-winning podiatrist who treats patients with foot ailments of all types, such as toe nail fungus, heel pain, foot and ankle injuries and fractures, bunions, circulatory problems, neuropathy, and even has toenail restoration services.

Patients walking into the new medical spa room at A Step Above Foot Care will be greeted with a tranquil, serene, and relaxing ambiance where they will receive a spa experience unlike any other, said Dr. Miller-Khawam.

Patients are offered affordable pedicure options, with the reassurance of a sanitary and hygienic space. Since spa services are by appointment only, patients get one-on-one attention from the professional and experienced pedicurist, who has been in the business of making toes beautiful for many years.

"My team and I are extremely excited to start this new venture of opening a medical spa, because it has been highly requested by many patients," said Dr. Miller-Khawam.

In addition to the opening of the medical spa, A Step Above Foot Care has also announced they are now offering MLS laser therapy, a treatment for inflammatory or painful conditions of the feet and ankles.

This advanced procedure is FDA-approved and according to Dr. Miller-Khawam, effectively treats conditions such as heel pain, sport injuries, bunion pain, neuromas, tendinitis, muscle strains and arthritis, to name just a few. In many cases, the MLS laser can prevent surgical repair of torn tendons and other soft tissue problems.

Dr. Miller-Khawam said she has treated countless patients, who have experienced incredible results from the MLS laser therapy.

"We find great joy in helping cure painful problems patients have and seeing them happy with the results," she said.

A Step Above Foot Care, located in the Woodruff Medical Doctors Offices, has been in practice for 15 years. With Dr. Miller-Khawam's skills and extensive backgrounds, your feet will surely be in good hands.
