

MLS Robotic Laser Therapy Get Rid Of Pain "The Natural Way"

*L*aser Therapy is the use of specific wavelengths of light to treat painful and debilitating conditions. Laser Therapy works with light energy entering the damaged cells and stimulating inter-cellular activity. This reduces pain in the area and speeds recovery of the damaged cells. Once the cells recover, the healing process is complete. Treatment is painless and lasts an average of 15 minutes. You may experience a comfortable sensation at the point of application. It does not generate heat and is safe to use over implanted metal devices. It is the only Class Four laser, which is safe to use over surgical hardware.

MLS Robotic Laser Treats:

- Foot & Ankle Pain
- Sports Injuries/Sprains & Strains
- Occupational Injuries
- Bunions/Neuropathy
- Post-Surgical Swelling
- Heel Pain/Plantar Fasciitis

Benefits of MLS Robotic Laser

- Non-Surgical Treatment
- No Negative Side Effects
- Rapid Results
- Speeds Healing Process

What can I expect after treatment?

Many people experience positive results within a few treatments, depending on if the condition is acute or chronic. Most acute conditions will need four to six treatments, and most chronic conditions will require 10 to 15 treatments. Acute conditions usually subside quickly, typically with one phase of treatment, while chronic conditions can be controlled with regular treatments if complete relief is not attained.

The effects of MLS Robotic Laser Therapy are cumulative; therefore, expect to see improvement as you proceed through your treatment plan. During the course of your treatment, the doctor will reassess your progress and adjust your treatment plan to achieve maximum benefits.

Why is our practice different?

Our practice is the first podiatry practice in Southern New Jersey to use the MLS Robotic Laser. Our doctors and technicians are certified in Advanced MLS Laser Therapy. This means we apply customized treatment protocols that are unique to our practice and each patient. Our practice is affiliated with the Laser Pain Management Association.

MLS Robotic Laser Therapy has been cleared by the FDA and proven successful as evidenced by extensive and credible studies conducted in our country's finest institutions including Harvard University.

Call 609-704-9001 for your FREE consultation to see if you are a candidate for MLS Laser Therapy.
